

## ***INSURED PATIENTS***

As per your obligations with a providing dentist you, the insured, are obligated to pay the estimated ``co-pay'' prior to services rendered the same day. As participating dentists, we discount our fees according to your insurance company's policy. We appreciate your cooperation in the agreement between you, the insurance company and our office.

ALSO:

Due to contractual limitations we are required to inform you of your choices involving restorative procedures (i.e. fillings) and how your insurance company will process those claims.

There are 2 basic materials used: Composite (tooth-colored filling material) and Amalgam (silver-colored filling material). Our practice specializes in cosmetic dentistry. We almost exclusively use Composite material. Insurance companies state using composite material on posterior (back teeth/molars) is ``optional'' and base the rate of payment on Amalgam pricing only, the lesser amount between the 2 materials. Therefore, any additional fees are the responsibility of the insured.

If you opt for Amalgam fillings, please notify the dentist before starting the procedure.

I have read and understand the above information.
